

General Checks

1. Check Import Requirements
[Automated Import Reference System \(AIRS\) - inspection.canada.ca](https://inspection.canada.ca)
2. The amount of product imported must correspond to the amount needed for trialing
3. Make sure your researcher has experience carrying out trials (bachelors degree, etc.)

Requirements for All Applications

Method of safe disposal of crops (destruct)

Crop destruct waiver

Contingency plan

Cover letter

Experimental use label

Trial maps/test locations

Protocol: design, treatments, methods, monitoring, procedures (trial method must be the same for multiple site research)

Ingredient SDSs

Ingredient manufacturing methods

Ingredient sources

% composition

Product Manufacturing Process

QA/QC process

Specific Requirements Depending on Ingredients

Fecal coliforms/salmonella test

Heavy metals test

Hazard Assessment (level III)

Microbial Details (culturing, sources...)
