

Product Name:

Guarantor:

List of Ingredients and Final Product Composition (CFIA)

a. Material Name	b. CAS #	c. Manufacturer Name	d. Country of Origin	e. source	h. Purpose of the Material	Amount added as ingredient (% w/w)	g. Concentration in final product (% w/w)	i. SDS included?	f. manufacturing / purification

Manufacturing Location:

Source Examples:

- Manufactured (for example dyes, chelators)
- Harvested (for example seaweed, straw, yucca)
- Mined (for example ores)
- By-product (for example baghouse/electrostatic dust, clinker, slag, electrolysis, ash)
- Recycled organics Footnotes 1 (for example source separated organics, compost, biosolids, pulp and paper), indicated specific inputs or feedstocks
- Synthesized (describe the chemical reaction and any residuals and reaction by-products)

Purpose of the Material

Active

- o Nutrient Source (primary, secondary, micronutrient)
- o Soil amendment/Source of organic matter
- o Beneficial microorganisms
- o Chelating Agent (EDTA)
- o Complexing Agent

Inert

- o pH adjuster/neutralizer
- o Stabilizers/preservatives
- o Carriers/diluents
- o Surfactants/wetting agents/emulsifiers
- o Anticaking/flow agents
- o Reaction aids
- o Solvents
- o Extractants
- o Binders/granulation agents
- o Colorants
- o Coatings/dust suppressants
- o Solubilizers/dispersants
- o Suspension aids
- o Antifoaming agents
- o Odor control agent
- o Feedstock

Safety data sheets which serve as basis for preliminary safety evaluation, identifying points (such as possible contaminants) which may need to be examined in greater detail. A safety data sheet should also provide a detailed explanation of precautions and protective measures.
