Purpose: Directions for Use: Use in accordance with the recommendations of a qualified professional or institution, including but not limited to a certified crop advisor, agronomist, university crop extension publication, or according to recommendations in an approved nutrient management plan. Apply X–X gallons per acre (X–X L/ha) depending on crop requirements and growing conditions. The product density is X.X lb/gal (X.X kg/L). Apply at ????, to crops?? or as directed by a qualified agronomist or crop advisor. Apply X–X pounds per acre (X–X kg/ha) depending on crop requirements and soil fertility levels. Distribute how?? apply according to recommended agronomic practices at ???time to ???crops. Application timing and rate should be adjusted based on crop needs and guidance from a qualified agronomist or crop advisor. Apply Only as Directed In PA, NJ, MD, VA do not apply more than 0.9 lb N per 1,000 sq ft per application on Turf.
